**Subject:** Notice in Accordance with TSCA Section 8(e): Results of a Test Study in Female, Non-Pregnant New Zealand White Rabbits with [REDACTED]

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of a Test Study in Female, Non-Pregnant New Zealand White Rabbits with [REDACTED], conducted by [REDACTED]. The substance is a developmental pesticide.

The test substance was planned to be administered once per day to groups of 3 rabbits via gavage for a maximum of 21 days. All dead and moribund sacrificed animals were assessed by gross pathology.

The dose levels were 1000, 300, and 100 mg/kg bw/d.

**The following findings were observed:**

*1000, and 300 mg/kg bw/d*

- Starting on study day 2, all animals showed reduce food consumption below 3% of the control level, significantly reduced water consumption, reduced feces and a continuing body weight loss.
- All animals of the high dose group were sacrificed moribund on study day 8; necropsy findings: 1 rabbit with stomach erosion, and 1 rabbit with stomach ulceration.
- All animals of the mid dose group were sacrificed moribund on study day 11; necropsy finding: 1 rabbit with small intestine empty, 2 rabbit with large intestine content watery.

---

*100 mg/kg bw/d*

- Starting on study day 2, all animals showed reduce food consumption below 30-50% of the control level, significantly reduced water consumption, and a continuing body weight loss.
- Two of three animals showed reduced feces.
- All animals of the low dose group were sacrificed moribund on study day 11: necropsy finding: 2 rabbits with small intestine empty, and 1 rabbit with large intestine content watery.

[REDACTED] understands that reporting of results from this study under TSCA 8(e) is in accordance with EPA's policy.
